

Electrical Engineering Intern Cover Letter

193 Shaunta Walks
Gloverton, MT 86518-6457

Dear Gray Medhurst,

In response to your job posting for electrical engineering intern, I am including this letter and my resume for your review.

In my previous role, I was responsible for as-needed support to the Transportation (rail, roads, structures, and aviation) engineering group in the field and/or office settings.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Perform or direct others in cable fabrication and other electronic and electrical assembly tasks
- Coursework in basic electronic circuits, analog and digital circuit analysis, control theory, power systems, and software programming
- Have an interest in the design of electronic, electrical, and computer controls as they relate to machines and equipment
- Good application skills of Microsoft Office tools, such as Word, Excel, PowerPoint, Outlook
- Familiar with programming languages (C, python, javascript)
- Basic understanding of security engineering and cryptography
- Experience with mobile development (iOS, Android, React Native)
- Work directly under the supervision of a licensed engineer

I really appreciate you taking the time to review my application for the position of electrical engineering intern.

Sincerely,

Morgan Volkman
