

# Engineer Lead Cover Letter

6256 Wisoky Mews Richborough, GA 85780-4970

**Dear Morgan O'Conner,**

I would like to submit my application for the engineer lead opening. Please accept this letter and the attached resume.

In my previous role, I was responsible for design direction, architecture, implementation and security of business-critical infrastructure platforms that host LFG applications.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- PC literacy – Knowledge of spreadsheets, database, scheduling programs, Microsoft Office, Outlook, Work Order System, BMS
- Experience with event/stream based processing platforms like Storm/Spark streaming/Samza/Flink
- Excellent working knowledge of computer based applications and programs, including EXCEL and Word
- Technical management of a team of platform engineers specialising in PaaS
- Understanding of Cloud Native applications and Twelve Factor Application design
- Able to install, configure and integrate PaaS technologies with existing heritage systems
- Work with the existing platform teams assisting in the augmentation of these platforms
- BE (Instrumentation / Electronics )

**Thank you for your time and consideration.**

Sincerely,

Denver Treutel
