

Engineer, Research Cover Letter

250 Dietrich GlenWest Gertieport, VA 13466

Dear Spencer Powlowski,

I am excited to be applying for the position of engineer, research. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for engineering and design support for a large distributed Splunk environment consisting of heavy forwarders, indexers, search head servers, spanning security , performance and operational roles.

Please consider my qualifications and experience:

- Under limited supervision, applies scientific knowledge and skills within respective discipline to product development projects
- Participate in project team meetings and design reviews
- Assist with overall planning and scheduling
- Identify complex technology capabilities and limitations using highly developed research techniques
- Interact with appropriate experts from IT in assessments
- Perform complex research assessments, present findings to technical audiences, with little guidance
- Regularly interact with and maintain relationships with counterparts internally, increase IT visibility
- Contribute research assessments to architecture domain direction

Thank you for your time and consideration.

Sincerely,

Parker Beatty
