Engineer, Research Cover Letter

8967 Harold UnionNorth Mandaside, SD 95817

Dear Ari Kiehn,

I am excited to be applying for the position of engineer, research. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for overall engineering and design support for a distributed Splunk environment consisting of heavy forwarders, indexers, and search head servers, spanning security, performance, and operational roles.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Proven system development and problem solving skills
- Strong devops knowledge and experience
- Knowledge and experience with current dynamic bandwidth provisioning
- Capable of handling multiple work assignments with minimal supervision
- Experience in ITK-snap and such tools are essential
- Expertise in python programming and scripting
- Experience in working with multinational projects
- A first successful research experience

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Finley Wisoky
