

Engineering Professor Cover Letter

19492 Leuschke Spur East Roland, OK 14513-4643

Dear Alexis Fisher,

I submit this application to express my sincere interest in the engineering professor position.

In my previous role, I was responsible for engineering assistance, instruction and consultation to Foundry users including student groups, student design teams and faculty for construction of prototypes and resolution of related technical problems.

Please consider my experience and qualifications for this position:

- Competence with computational tools and experience with laboratory development
- Strong commitment to teaching excellence and hands-on laboratory based instruction
- Dedication to continued professional development and scholarship
- Evidence of interest in working with students
- Experience in design education and/or entrepreneurship and innovation
- Experience in the conduction of research in innovative and burgeoning areas of relevant engineering fields
- Recent, relevant experience in industry, industry sponsored grants, commercialization, and/or industry relations
- A record of relevant scholarship is essential

I really appreciate you taking the time to review my application for the position of engineering professor.

Sincerely,

Dallas Waters
