

Equipment Support Cover Letter

928 Eryn Radial West Elmer, WI 44672

Dear Finley Rau,

In response to your job posting for equipment support, I am including this letter and my resume for your review.

In my previous role, I was responsible for technical support to field engineers, technicians and product support who are diagnosing, troubleshooting, repairing and debugging complex electro/mechanical equipment, computer systems, and/or complex software.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Aptitude in troubleshooting, rebuilding, and maintaining various manufacturing equipment
- Coordinating Support Equipment maintenance requirements
- Planning, researching, developing, analyzing and retrofitting repair solutions that comply with customer, regulatory, and company requirements
- Defining the procedures, special tooling, kit requirements, work packages, and material requirements for accomplishment of inspections
- Planning and coordinating modifications, maintenance, and repairing of enterprise products
- Assisting engineering staff in planning and incorporating improvements
- Assisting project development, and technical support activities related to Support Equipment maintenance, modifications, calibration, proof load test and repairs per established customer, regulatory, and company requirements
- Reviewing and recommending projects and proposals for aircraft Support Equipment modification

I really appreciate you taking the time to review my application for the position of equipment support.
