

Expert Software Engineer Cover Letter

413 Lani Trail
Laticiafort, SC 60828

Dear Marion Cartwright,

In response to your job posting for expert software engineer, I am including this letter and my resume for your review.

Previously, I was responsible for development support during the testing phases (functional, performance, regression, end-to-end, and user acceptance testing) for software inconsistencies between the deliverable and the design specifications.

Please consider my experience and qualifications for this position:

- Application of formal proof and verification techniques to real world software, TLA+
- Detailed knowledge of mission critical software development in a modern software engineering environment from requirements through design, implementation, testing and acceptance
- Experience of establishing software programmes of work and requirements suitable for sub-contracting
- Experience of audit, review and inspection of third party software development
- Understanding of current international software standards and safety standards, such as Def Stan 0056 or IEC61508
- Experience with Tomcat or Jetty
- Spark knowledge is big advantage
- SaaS development is an advantage

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Cameron Kiehn
