

Front End Software Engineer Cover Letter

9783 Mauricio Field Jasonfurt, MI 92838-7365

Dear Onyx Davis,

I submit this application to express my sincere interest in the front end software engineer position.

In my previous role, I was responsible for technical expertise in support of application development and govern the implementations of the applications.

My experience is an excellent fit for the list of requirements in this job:

- Expertise in building and maintaining large scale web applications
- Built tools from scratch that are used by large numbers of people
- Motivated self starter that can identify problems, come with solutions and can execute on ideas
- Strong experience with JavaScript frameworks like Knockout, Angular, Bootstrap, jQuery/jQueryUI, Modernizer
- Understanding of RESTful web services and browser-based MVC architecture and implementation
- Knowledge of ecmascript6 and V8
- Working knowledge of MySQL or other NoSQL databases
- Expert understanding of HTML, CSS, JavaScript and jQuery

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Alexis Ortiz
