Full Stack Cover Letter

63392 Chung KnollNorth Kandi, CA 64535

Dear Briar Bode,

I submit this application to express my sincere interest in the full stack position.

Previously, I was responsible for l3 production support and work with the enterprise application support and platform infrastructure teams to balance service innovation and reliability.

Please consider my qualifications and experience:

- Experience in Data Modeling and/or Data Architecture
- Demonstrates innovative thinking and initiative
- Experience with multiple enterprise architecture modeling tools such as Sparx Enterprise Architect, IBM Rationale, or Microsoft Visual Studio
- Experience with front-end css and/or javascript frameworks
- Familiar with interacting with databases via SQL and ORMs
- A strong working knowledge of Backbone, Bootstrap and jQuery-UI
- Familiarity with other data stores such as Elasticsearch and Excel
- Familiarity with other scripting languages such as VBA

Thank you for considering me to become a member of your team.

Sincerely,

Shiloh Lehner
