Full Stack Cover Letter

37089 Jonah RoadsCleoton, IA 54174

Dear Skyler Langosh,

In response to your job posting for full stack, I am including this letter and my resume for your review.

Previously, I was responsible for single page application architecture and client side MVC such as Angular.

Please consider my qualifications and experience:

- Good understanding of Python and a willingness to learn new technologies and languages
- Good understanding of how to build API's and RESTful web services
- Understand and assess levels of risk, tracking and monitoring findings and senior stakeholder management
- Log aggregation tools and techniques, analysis and reporting
- Manual security testing to find vulnerabilities and logical issues
- Extensive knowledge in Object oriented programming (OOP)
- Knowledge with SQL and NOSQL databases
- Knowledge in website development and architecture design

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Royal Bruen
