

Game Developer Cover Letter

8604 Gibson RampLake Mariko, TN 98606

Dear Dallas Robel,

I submit this application to express my sincere interest in the game developer position.

In my previous role, I was responsible for technical guidance and drive a culture of continuous improvement in efficient troubleshooting across a range of infrastructure based products and platforms.

My experience is an excellent fit for the list of requirements in this job:

- Knowledge of asynchronous development patterns
- Expertise running large scale, live services with Amazon Web Services or another public cloud service
- Client is looking for an experienced software engineer to help create 343 Industries next-generation game editor to enable artists and designers to create innovative games in the Halo universe
- C# and .NET programming skills
- Experience in building tools to manage the content pipeline
- Experience in debugging and diagnostics
- Understanding of the Unity 3d game engine
- Understanding of character animation

I really appreciate you taking the time to review my application for the position of game developer.

Sincerely,

Brooklyn Schuppe
