

Game Developer Cover Letter

4327 Price BypassLake Donnieburgh, PA 68687

Dear Haven Kemmer,

I submit this application to express my sincere interest in the game developer position.

In my previous role, I was responsible for technical solutions and write technical design documents.

Please consider my experience and qualifications for this position:

- Experience with continuous integration development processes
- Experience developing physics, AI, animation, tools, networking, or graphics systems
- Experience developing and delivering video games
- Design and implement functional bronchoscopy simulator prototype using Unity3D and C#
- Design and implement an alternate controller using Arduino + sensors
- Deploy simulator prototypes multiple platforms
- Experience as a .NET web developer
- Knowledge of .NET, C#, ASP.NET MVC, SQL Server

I really appreciate you taking the time to review my application for the position of game developer.

Sincerely,

Lennox Parisian
