

Geology Cover Letter

355 Hagenes StreamHeathcotetown, IN 34251-3151

Dear Haven Dickens,

Please consider me for the geology opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for engineering geological input, and parameter derivation, to the design of the following in both soil and rock:.

My experience is an excellent fit for the list of requirements in this job:

- Skill in written and verbal communication, critical thinking, data analysis, problem solving and time management
- Experience as a team builder who empowers others and provides guidance, who is open to feedback and constantly strives to improve
- Well versed in various analytical methodologies used in silver and gold deposits and understanding and application of QA/QC processes
- Experience with the process of developing mineral resources and conversion to mineral reserves
- Meet the minimum requirements of a Qualified Person according to NI 43-101
- Completed course work in engineering through the sophomore level with a GPA of 3.25 or higher
- Good analytical, communication, and human relations skills that is an extreme out of the box thinker
- Technical skills learned at the university level are applied in the practical environment and developed through predominantly on-the-job training

I really appreciate you taking the time to review my application for the position of geology.

Sincerely,

Charlie McClure
