

# Geology Cover Letter

8374 Ozie IslandsGastonport, CA 35213-1844

**Dear Justice Stoltenberg,**

I am excited to be applying for the position of geology. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for service to the geological community through peer review for national and international journals and/or funders.

Please consider my qualifications and experience:

- Maintain a valid State driver's license for light vehicles
- Maintain a valid driver's license for the operation of light vehicles
- Relevant geoscientific university background
- Enthusiastic and structured approach to the challenge of doing a Master's Thesis in an industry setting
- The key focus of the role is as part of the Technical Stewardship team, providing technical in Geoscience and Mineral Resource evaluation support to both Copper assets and NOJVs within Minerals Americas
- Whilst this will often be related to the RP&D function within operated assets, this will also reach into operations and other non/operated assets and projects, with strong linkage through the CAP cycle and activities
- The role will also require participation in a broad scope of activities in support of Mineral Resource and Ore Reserve practice improvement and governance activities for annual reporting
- Undertaking a broad range of technical data evaluation, geological modelling and resource evaluation activities in support of mine planning and evaluation requirements

**Thank you in advance for reviewing my candidacy for this position.**

Sincerely,

Casey Tillman
