

# Geology Cover Letter

22705 Williams StreetHerthashire, KY 12119-8108

**Dear Parker Wilderman,**

I submit this application to express my sincere interest in the geology position.

Previously, I was responsible for field and office support on a variety of environmental services and water resources projects.

Please consider my experience and qualifications for this position:

- Demonstrable understanding of QAQC techniques as applied to all areas of geological and analytical data gathering and interpretation
- Experience working in an underground and open cut mining environment
- Experience with narrow vein deposits will be favourably considered
- Capabilities in Geostatistical Modelling, Minerals Resources Estimation and be an experienced user of DataMine and Leapfrog software
- Experience in Grade Control in a large underground production environment will be well regarded
- Experience with Brownfields exploration
- Global recognition for structural geology expertise
- Strong field experience in structural mapping (global and across multiple commodities)

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Sutton Adams
