

Geology Cover Letter

427 Hermiston Mountain Nolanville, AR 25525-8964

Dear Oakley Kemmer,

I submit this application to express my sincere interest in the geology position.

In the previous role, I was responsible for a strong contribution to the site safety culture and programs, encouraging and ensuring others do the same.

Please consider my experience and qualifications for this position:

- Train Indonesian national geologists in best procedures to ensure reliable data collection, recording, compilation and reporting according to mining industrial standards (e.g., JORC)
- Monitor and participate in the collection and plotting of geological field data with emphasis on structural geology
- Conduct regular field inspections to ensure procedures are being followed and to identify & correct procedural problems
- Keep up-to-date with industry standard practice of geologic data collection
- Develop and coach national staff to build capacity, ensure knowledge transfer and that analyses and recommendations from our Underground Geology Team follow international best practices
- Provide professional advice / recommendations to PTFI leadership and supervisory staff
- Assist in the development of the Underground Geology team, which provides technical raw and processed data, advice and support to Underground Operations
- Perform technical work for the DOZ, DMLZ and GBC caving operations and for the Big Gossan stope mining operations, all of which are within PTFI's Grasberg business unit

Thank you in advance for reviewing my candidacy for this position.

Sincerely,
