

Geophysicist Cover Letter

916 Christia PortsClassieville, MS 41189-2344

Dear Alexis Leuschke,

I submit this application to express my sincere interest in the geophysicist position.

Previously, I was responsible for high quality geophysical products in support of development horizontal well planning, geomodel construction and horizontal drilling support.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- In conjunction with Pore Pressure Manager and Central Functions, ensure technical oversight
- Follow company's best practices
- Develop effective working relationship within the overall Operations team
- Contribute with other stakeholders to a reliable well operation and basin modelling Data Bases
- Support Conventional Petroleum by developing effective network with JV partners, regulatory agencies and technical service providers to ensure expedited support / approvals, as necessary
- Develop and foster a collaborative work environment with technical computing systems, data management processes and work procedures that allow for a highly motivated and focused staff
- If applicable, contribute and advise in seismic geophysical data and interpretation
- Menlo Park, CA FEW vacancies

I really appreciate you taking the time to review my application for the position of geophysicist.

Sincerely,
