

# Global Architect Cover Letter

8063 Bud Falls West Lyle, CA 63931-5738

**Dear Justice Harvey,**

In response to your job posting for global architect, I am including this letter and my resume for your review.

In my previous role, I was responsible for the highest level of expertise for the development, specification, implementation, and communication of IT technology architecture plans; infrastructure components required to support it and the integration of application architectures.

My experience is an excellent fit for the list of requirements in this job:

- Direct Tax Processes and Solutions
- Cash Management Processes and Solutions
- Minimum of 6 months experience with AWS or Azure
- Background in financial services or similar regulated industry preferred
- Experienced supporting large and complex desktop environments, specifically VDI
- Experienced in working on large complex Desktop transformation programs
- Experience of working with managed service providers and outsourcers
- Experience with profile management and optimisation

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Story Rowe
