

Global Information Security Cover Letter

104 Blanda Summit Kilbackmouth, SC 97845-5649

Dear Landry Kunze,

Please consider me for the global information security opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for oversight and guidance for organization's network security solutions including; firewall, IPS, anti-spyware, antivirus, full disk encryption, agent-based web filtering, application whitelisting and host integrity.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- An interest in developing expertise in the IT Security space
- Experience in malware analysis is a distinct advantage
- Strong understanding of firewall, unified threat management, IDS/IPS and behavior analysis technologies
- Knowledge of Cloud technologies (AWS, Azure, etc)
- Knowledge of red/blue team development and functions
- Demonstrated project management experience, especially for large projects
- Develop and implement communication plans and programs for team projects and initiatives
- Partner with business leaders, function heads, project managers and other internal stakeholders across the organization – including HR, legal, Internal Communications and Change, and others -- in the development, execution and measurement of communications activities including crisis engagement, awareness campaigns, training and phishing exercises

I really appreciate you taking the time to review my application for the position of global information security.

Sincerely,
