

Health Project Manager Cover Letter

9639 West RueEast Majorview, WV 86109-8430

Dear Brooklyn Mayer,

In response to your job posting for health project manager, I am including this letter and my resume for your review.

Previously, I was responsible for guidance to the organization on quality compliance implications of digital health technologies in the healthcare space.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Demonstrated leadership and effective communication, both up and down the stakeholder chain
- A team player, who is self-directed, can work independently with minimum supervision and able to focus on the right information being delivered to the right set of stakeholders at the right times
- Strong track record of on-time project delivery and managing the entire project life cycle
- Previous experience managing hospital or Health IT projects preferred
- Understanding of healthcare applications and interdependencies
- Provide proven and custom-made structured analysis
- Support entities when implementing business solution to accelerate project execution
- Work closely with subject matter experts to identify new transversal opportunities

Thank you for considering me to become a member of your team.

Sincerely,

Greer Rolfson
