

# Industrial Design Cover Letter

37365 Kevin Cornerslmatown, TX 69389-6058

**Dear Rory Conn,**

I submit this application to express my sincere interest in the industrial design position.

Previously, I was responsible for design and research to support PIT in the development of creative, aesthetic, innovative solutions along the product innovation process, using the appropriate design and research tools.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- High-level understanding of workplace dynamics for teams
- Excellent sketching and visualization capabilities and a strong understanding of prototyping and construction
- Record of innovative and clever product development
- Keen eye toward the development of impactful product aesthetics
- Mastery of design process to generate memorable solutions
- Proven creation of products that became marketplace disruptors
- Exposure and knowledge of rapid prototyping (3D Printing, SLA, CNC)
- Good understanding of design methodology

**I really appreciate you taking the time to review my application for the position of industrial design.**

Sincerely,

Robin Gulgowski
