

Industrial Maintenance Technician Cover Letter

6634 Bernhard PointLaunaside, OK 87902-5987

Dear Max Stokes,

I submit this application to express my sincere interest in the industrial maintenance technician position.

In my previous role, I was responsible for repair and operational support of optical scanning, weighing devices, PLC electronics, and other logic controls.

Please consider my qualifications and experience:

- Experience maintaining, troubleshooting, repairing, aligning and working with, power transmission, bearings, gearboxes and drive systems Experience reading maintenance schematics / blueprints
- Comfortable Working in Refineries, Chemical Plants
- Highly motivated, self directed, multi crafted worker that is able to work autonomously in a fast paced and often loud production environment
- Multiple platforms such as Allen Bradley PLC5, Control Logix, HMI, Siemens and Servo Drive programming and troubleshooting experience preferred
- Mechanical troubleshooting experience in high speed packaging and/or highly automated continuous process environment preferred
- Schematics for both electrical and mechanical
- Current TWIC and OSHA
- Advanced Mechanics

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Phoenix Zulauf
