

Information Risk Management Cover Letter

5750 West StravenuePort Manuela, NC 85802-7912

Dear Tatum Morar,

In response to your job posting for information risk management, I am including this letter and my resume for your review.

Previously, I was responsible for support to clients, IT management and staff in risk assessments and the implementation and operational aspects of appropriate information security procedures and products.

Please consider my qualifications and experience:

- Demonstrated history of managing teams of operations in a 24/7/365 mission critical environment, including managing around-the-clock global response teams
- Expert-level understanding of today's IT threat landscape and information security architectures, applicable laws, regulations, and compliance frameworks (SOC I/II, ISO 27001, PCI-DSS, NACHA)
- Proven experience instituting a "culture of security" where security becomes ingrained in every employees day to day activities
- Industry certifications such as CISSP, CISSLP, or CISSP-ISSMP
- Experience with SOC2 Type 2 readiness initiatives and audit coordination
- Experience with IT Audit is considered an asset
- Familiarity with Group Benefits or Retirement Solution
- Familiar with IT General Controls as defined in GAAPs

I really appreciate you taking the time to review my application for the position of information risk management.

Sincerely,

Rory Kihn
