

# Information Security Risk Manager Cover Letter

561 Aufderhar Courts East Thanhview, MI 55691

**Dear Peyton Hahn,**

I submit this application to express my sincere interest in the information security risk manager position.

In my previous role, I was responsible for web security guidelines and solutions to dev teams on authentication, authorization, session management, data protection (encryption)/key management etc.

Please consider my qualifications and experience:

- CCNA, CCENT, CCNP, GSEC, MCSA certifications are preferred
- Possess the credibility and experience to act as a subject matter expert and provide thought leadership regarding IT controls design, SOX, and IT Risk Assessments
- Strong knowledge of IT internal control requirements and security policy (Information Asset Protection Policies)
- Experience managing external and internal audits for IT preferred
- Need to become intelligence led to effectively keep pace with ever increasing and sophisticated cyber threats
- Have expert and extensive Information Security Risk and Operational Risk knowledge to face off appropriately to the different risk managers in the Group and also external parties
- A change agent who is not afraid to change the status quo in order to drive Group strategy
- Assist the GB / GF / HTS (IT) to understand information security risks and formulate and implement effective plans and controls to manage the risks

**Thank you for considering me to become a member of your team.**

Sincerely,
