

Information Systems Analyst Cover Letter

83015 Roseanna HavenNorth Kiethmouth, NH 64742

Dear Cameron Schiller,

I submit this application to express my sincere interest in the information systems analyst position.

Previously, I was responsible for client with explicit details on security and industry best practices and advise management on investments to safeguard computer and network systems.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Be able to present clearly and concisely on a weekly basis to upper management and customers
- Experience with Waterfall and Agile type development programs
- Experience with Cloud implementation
- Knowledge/experience with xSIS
- Have experience with complex program planning where a multitude of resources are all contributing to the final product
- Good working knowledge of HIPAA, NIST, SOX and ISO principles, concepts and practices
- Solid understanding of LAN/WAN concepts
- Demonstrated understanding of statistical concepts and strong mathematics background

Thank you for your time and consideration.

Sincerely,

Ari McGlynn
