

Information Systems Analyst Cover Letter

3902 Collin Road East Kennethside, OR 04459

Dear Parker Prohaska,

In response to your job posting for information systems analyst, I am including this letter and my resume for your review.

In my previous role, I was responsible for subject matter expertise to executive management on a broad range of information security standards and best practices and offer strategic and tactical security guidance for all IT projects, including the evaluation and recommendation of technical controls.

Please consider my experience and qualifications for this position:

- Strategic thinking, exceptional understanding of IoT (Internet of Things) and Big Data concepts
- Experience in R, Hive, SQL, C#, Java or Python and Hadoop advantageous
- Data reporting using Qlikview, SQL, Power BI or Microsoft visualization tools
- Business knowledge and systems thinking
- Working knowledge of data communication methods
- Firm understanding of the software development life cycle (SDLC)
- Execute detailed data mining and analysis and validate findings per system requirements
- Technical troubleshooting of detailed data issues to uncover root cause and remediate

Thank you for taking your time to review my application.

Sincerely,

Lennox Hessel
