

# Intelligence Support Cover Letter

87131 Flor FortWizaport, NJ 20089

**Dear Onyx Gleason,**

In response to your job posting for intelligence support, I am including this letter and my resume for your review.

In my previous role, I was responsible for support to global information requirements through the dissemination of publicly available information, media, and Open Source Intelligence (OSINT) by maintaining multiple intelligence web portals, sites, and online databases.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Strong experience with SQL/SQL server, or other equivalent data mining programming languages like SAS
- Has highly proficient mathematical and analytical skills
- Tableau certified professional preferred
- Experience in MS Transact SQL
- Solid experience with Informatica mappings, work flow design, Informatica debug modes
- Datawarehousing fundamentals (Oracle WareHouse - ETL)
- Business Objects XI R4.1 Administration (any experience of R3.1 would also benefit)
- Business Objects XI Webi/Deski/Universe design and deployment

**Thank you for your time and consideration.**

Sincerely,

Stevie Pollich
