IT Manager, Development Cover Letter

5928 Crooks ParkwayNew Kenya, DE 46671

Dear Morgan Mann,

I would like to submit my application for the IT manager, development opening. Please accept this letter and the attached resume.

Previously, I was responsible for reasonable assurance on conformance and compliance of Technology/Business projects and programs with architect guidelines and standards.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Previous hands-on professional experience in all phases of the SDLC (requirements through testing)
- Be point of contact as an IT partner staying abreast to business strategy, goals, objectives and operational performance
- Coach and mentor members of the team to effectively delivery and support the technology solutions the team provides to its business partners
- Accountable for identifying needs, meeting commitments and continuous process improvement in the 24x7 application support process of supported systems
- Create a direction and forward looking roadmap in conjunction with business partners to generate a clear set of projects and initiatives that align with business priorities
- Strong understanding of the following – databases, project management lifecycle, programing, application architecture and infrastructure components
- Senior Leadership influence experience
- Experience with SAP BI and/or SAP Fiori is preferred

Thank you for your time and consideration.

Sincerely,
