

IT Security Cover Letter

7991 Kshlerin LocksWilkinsonshire, MA 18823-5842

Dear Justice Mohr,

I would like to submit my application for the IT security opening. Please accept this letter and the attached resume.

In the previous role, I was responsible for leadership and direction to a team of associates that is tasked with implementing and supporting network engineering security technologies in a large enterprise environment (Network Firewalls, IPS sensors, ACS/AAA, ASA's and VPN, Web Proxy, and Access-lists).

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Understanding of the IT risk management and security fields
- CISA, CISSP or other similar professional designations is preferred
- Strong decision-making and prioritizing abilities
- General understanding of Network, Systems, Databases, and Middleware components and their basic hardening configuration
- Application and infrastructure penetration testing
- Problem solver, Decision making and influence others
- Worked in enterprise IT Security environment and managed different building blocks of infrastructure security like Network, Systems and application security technologies like Firewalls, IPS/IDS, End point security, threat detection/management, application security components, compliance tools
- In-depth Understanding of Web Application Architecture & Web Applications (including deployments/configurations)

Thank you for your time and consideration.

Sincerely,

Jordan Tillman
