

# Java Web Application Developer Cover Letter

97009 Bennie KeyAlbertshire, TN 17425

**Dear Bellamy Goodwin,**

In response to your job posting for java web application developer, I am including this letter and my resume for your review.

In my previous role, I was responsible for technical leadership in Enterprise Java (JEE) application development.

Please consider my qualifications and experience:

- Hands on experience in OOAD and Design Patterns
- Certified Java Developer (Preferred)
- Prior use of MS Office suite to perform quality and analysis functions related to DB management ( Access, Excel, PowerPoint, MS Project and Word)
- Experience developing applications using the development frameworks such as Hibernate, Spring, SQL Developer, and VIM in an Agile environment
- Experience developing SQL data structures and tables to be integrated with web-based application software
- Experience using Oracle systems and SQL calls
- Experience with SqlServer, Microsoft Visual Studio and MVC preferred
- Experience on Java Spring Framework along with JavaScript, AngularJS, Core Java, J2EE and other related technologies

**Thank you in advance for reviewing my candidacy for this position.**

Sincerely,

Ryan Murazik
