JEE Developer Cover Letter

150 Jon RoadSporerside, AR 65635

Dear Max Gibson,

Please consider me for the JEE developer opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for development and issue resolution expertise in collaboration with data scientists, intelligence analysts, developers, and other participants at the direction of a project manager.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Knowledge of modern web applications, mobile development technologies, and frameworks (such as JS, React, Angular, PWA, AMP, Spring MVC)
- Experience with JEE development on Tomcat and/or Weblogic Server
- Development of web services based on Java EE standards such as Spring Boot or JAX RPC or JAX-WS
- Knowledge of DevOps and open standards for Continuous Integration
- Use of Maven, Jenkins, Sonar and Junit
- Development using RESTful standards and patterns for rapid API development
- Strong understanding of JSON, XML and XML namespaces
- Use of proxies with SOAP or REST transports

Thank you for your time and consideration.

Sincerely,

Oakley Yost
