

JEE Developer Cover Letter

84033 Mohr Estate Carolehaven, FL 03009

Dear Dylan Swaniawski,

I submit this application to express my sincere interest in the JEE developer position.

In my previous role, I was responsible for technical guidance in developing and implementing innovative software from concept to delivery in support of educational research and teaching.

My experience is an excellent fit for the list of requirements in this job:

- Modify and configure applications/systems as specified in the requirements and/or technical design document
- Support technical design, development and unit test of RESTful APIs using Spring Boot framework
- This will include some on-call support when the application goes live
- Passionate about deliver
- Able to demonstrate their work every 2 weeks
- Strong experience in a dynamic JEE development environment
- Proven OO skills, implementing established design patterns and best practice
- Experience in UML 2.0 to describe design and model technical solutions

I really appreciate you taking the time to review my application for the position of JEE developer.

Sincerely,

Robin Leffler
