

# Junior Developer Cover Letter

841 Hermiston LoafFadelbury, AR 87586

**Dear Avery White,**

In response to your job posting for junior developer, I am including this letter and my resume for your review.

Previously, I was responsible for design development of projects involving Java application development, migrations, and additions to existing applications.

Please consider my experience and qualifications for this position:

- Able to write W3C compliant HTML5
- Able to work with front-end CSS frameworks (bootstrap or similar frameworks)
- Basic knowledge of Javascript/Jquery
- Able to understand and work with JQuery plugins
- Be proficient in object-oriented programming languages
- Basic experience/visibility with VBA
- Business-user level exposure and understanding of web technologies (eg.Dreamweaver/or others)
- Strong commitment to quality, systems architecture, documentation and customer centric philosophy

**Thank you in advance for reviewing my candidacy for this position.**

Sincerely,

Robin Luettgen
