

# Junior Developer Cover Letter

811 Krysten ParksLake Herbhaven, MN 56746-9171

**Dear Riley Schmidt,**

I am excited to be applying for the position of junior developer. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for security support for Agency initiatives, including but not limited to Agile, DevOps, the Modern Development Environment (MDE), and the Agency Cloud Infrastructure (ACI).

Please consider my experience and qualifications for this position:

- Experience with relational databases, including Microsoft SQL Server, Oracle, or MySQL
- To translate business requirements into technical requirements, identifying any gaps
- To write code to specification for applications / products during the build phase of the software development lifecycle
- To work on a single complex project, or multiple standard projects, as a team member or team leader
- Review requirements to understand how both functional and non-functional aspects
- Review requirements to understand how they will be tested following production of code
- Application development (Java or C# preferred)
- Demonstrated understanding of the software development process (both waterfall and agile) including the role and importance of various levels of testing, including smoke, functional, regression, user acceptance

**I really appreciate you taking the time to review my application for the position of junior developer.**

Sincerely,
