

Junior Test Engineer Cover Letter

103 Larson MountainsWillieborough, MS 55614

Dear Charlie Zemlak,

I am excited to be applying for the position of junior test engineer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for qA support for program peer reviews (software & courseware), regression testing, integration & test, and functional sell-off.

My experience is an excellent fit for the list of requirements in this job:

- Experience in writing test plans and creating test cases based on requirements and specifications
- Experience in design and development of automated tests or test scripts in Python or C programming language
- Familiarity with virtualized environments such as VMWare or knowledge of cloud-based services such as Amazon AWS would be an asset
- Resourceful self-starter with strong interpersonal skills
- Works well both individually and within a team and takes pride in the overall achievements of the team personal accomplishments
- Identifies appropriate tests based upon requirements
- Experience using test automation frameworks
- Familiarity with L2/L3 Network device functionality, configuration, user interface protocols (TCP/IP, SNMP, DHCP, IGMP, PPP, etc)

Thank you in advance for reviewing my candidacy for this position.

Sincerely,

Shiloh Medhurst
