

# Junior Test Engineer Cover Letter

95997 Myong CliffsCollinsside, TX 66546

**Dear Indigo Gleason,**

In response to your job posting for junior test engineer, I am including this letter and my resume for your review.

Previously, I was responsible for accurate estimations and designs, create project plans, test plans, & test strategies for testing functional and non-functional requirements.

Please consider my qualifications and experience:

- Understanding of multiple technologies like SQL, HTML, XML, FTP, SFTP
- Minimum B.Tech or equivalent with Electronics and Communication/Instrumentation/Computer Science is mandatory
- Experience in web testing / web tools and applications
- Very good English and Hungarian
- Active Secret security clearance on Day 1
- Understanding and first experience of embedded systems, ideally with real-time requirements
- Unix / Python /Perl scripting
- Bigdata technologies – HDFS, HIVE, Scoop, Flume

**Thank you in advance for taking the time to read my cover letter and to review my resume.**

Sincerely,

Oakley Lind
