

# Junior Test Engineer Cover Letter

88002 Cremin WaysShauntastad, NV 86947

**Dear Quinn Lesch,**

I am excited to be applying for the position of junior test engineer. Please accept this letter and the attached resume as my interest in this position.

In my previous role, I was responsible for consultancy and advisory services to the business, systems development and QA for functional and non-functional Automated Testing.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Shall have good communication skills and presentation skills
- Interest in learning new technology and an eye for detail
- Good knowledge of OOP basics, Java core and other scripting languages
- General experience in Windows environments
- Self-motivated, detail-oriented with excellent time management and organizational skills
- Knowledge of optical switching and transmission products and related technology and standards
- Object-oriented SW development skills with practical experience
- Experience providing engineering services to U.S. Navy or in shipyards

**Thank you for considering me to become a member of your team.**

Sincerely,

River Goodwin
