In the previous role, I was responsible for input on functional product requirements and design specifications during test planning stages of software development life cycle.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Self-driven and able to manage multiple tasks and responsibilities
- BS or MS in Computer Science or related software engineering or technology studies
- Objective-C or Swift for iOS
- Scripting language knowledge (JavaScript, VBScript)
- Experience using a Windows operating Systems
- Working knowledge of the Windows and Linux Operating Systems
- Working knowledge of computer forensics and related systems, processing and applications
- Exposure /experience in creating test cases/ test scripts for input in the Rational Quality Management tool or equivalent tool

Thank you for your time and consideration.

Sincerely,

Avery Rempel
