

Lead Application Developer Cover Letter

902 Kermit Trail New Carroll, AK 95023-9789

Dear Greer Morissette,

I am excited to be applying for the position of lead application developer. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for technical expertise in leading the customer data and service modeling, design and enhancement, to ensure the reusable, scalable, agile and high performance of the Enterprise Master Data Services are delivered.

Please consider my experience and qualifications for this position:

- Experience with working on in a Financial Services domain
- The project focuses on design/build of Synapse, a core middleware framework with a central orchestration engine, event based processing and distributed functional modules
- Understanding of Legacy Systems best practices
- Implementing continuous integration using CI tools such as Jenkins, Maven
- Applying knowledge on using source code repository tools such as SVN, GIT to back up the code and metadata
- Data warehouse (Oracle, Teradata) architecture, design and development of data and metadata model
- Datacom/ODBC queries
- Enscribe files

Thank you for considering me to become a member of your team.

Sincerely,

Rory Anderson
