Lead Application Developer Cover Letter

29704 Kub FerryWest German, UT 90710-0577

Dear Azariah Fadel,

I submit this application to express my sincere interest in the lead application developer position.

Previously, I was responsible for ongoing support of the environment by developing processes and executing object migrations, and performance monitoring.

Please consider my qualifications and experience:

- Knowledge of business applications, underlying architecture and product lifecycle
- Experience with Mongo DB, Java Content Repository and Apache Jackrabbit
- Clear understanding of system architecture principles and standards
- Experience in integrated systems design and development
- Lead a team of 10+ AEM developers & testers
- Apply new tools, processes and technical developments to drive continuous improvement throughout the software development lifecycle
- Collaborate with other developers and stakeholders to build technical solution
- Learn about emerging software development methods, tools and standards

Thank you for considering me to become a member of your team.

Sincerely,

Onyx Hayes
