Lead Application Developer Cover Letter

22390 Kory CrescentNew Nathanaelmouth, HI 38158-3746

Dear Dallas Stroman,

I am excited to be applying for the position of lead application developer. Please accept this letter and the attached resume as my interest in this position.

In the previous role, I was responsible for support and guidance to other less experienced members of the development team, helping them to solve complex issues within the software they are developing.

Please consider my experience and qualifications for this position:

- Prior experience in database technologies especially in Oracle 11g/12c
- Webservices and middleware technologies
- Informatica and OBIEE technologies
- Implementing and customizing vendor software and / or building custom financial applications through full system development life-cycle (analyze, design, develop, test, implement, support)
- Continuous improvement of server environments for development and production
- Demonstrable Agile, Scrum or Kanban experience
- Proven experience in the operation and analysis of application server hardware, software, and standards, data retrieval methodologies and mainframe applications
- Solid proven hands-on development experience in Java & J2EE framework on Unix/Windows environment

Thank you for considering me to become a member of your team.

Sincerely,

Skyler Johnson
