

Lead Product Engineer Cover Letter

22467 Keeling OverpassNormanbury, ND 83261

Dear Drew Daniel,

I am excited to be applying for the position of lead product engineer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for technical expertise in the areas of fluidics, assays, 3D printing, materials, cell-biomaterial interactions, cell culture, and characterization of 3D printed scaffolds to support the development of a 3D printed lung scaffold suitable for recellularization.

Please consider my qualifications and experience:

- Collaborated with others to ensure that feasible ideas are recognised and implemented
- Seeks and proposes opportunities for new business or ways of working
- Alters the team's or departments approach to making the most of changing circumstances
- Analyses information and makes logical and well-reasoned judgements
- Acts as Project Representative from immediate group they are assigned to in the resolution of problems/issues encountered across multiple functions which require a coordinated response
- Proficient in Microchip MPLab for processor software development
- Proficient in Assembly Language and C Language
- Strong core Java and JEE skills (Servlets, JSPs, JDBC, JTA, JAAS, EJBs, JSTL, JMS, XML)

Thank you for your time and consideration.

Sincerely,

Emerson Schaefer
