

# Lead Product Engineer Cover Letter

67564 Kozey LightsEffertzland, KS 60604-3262

**Dear Dakota Lind,**

I would like to submit my application for the lead product engineer opening. Please accept this letter and the attached resume.

Previously, I was responsible for support to the designers in the specification and process development of materials and processes needed to build printed wiring boards, printed wiring assemblies, and LRUs.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Experience with Spring and ORM (Hibernate, MyBatis ) frameworks
- Extensive experience in Rest APIs & SOAP web services
- Experience with source control systems like CVS, ClearCase or Perforce
- Experience with hosted solutions like AWS (Amazon Web Services)
- Experience with Microservices, Spring cloud/Netflix OSS, Docker, Container Orchestration
- IPTV solution implementation and configuration
- Understanding of enterprise network architecture and application
- Demonstrated technical knowledge across multiple Engineering disciplines

**Thank you for considering me to become a member of your team.**

Sincerely,

Tatum Ziemann
