

Lead Product Engineer Cover Letter

315 Tyisha SpringPort Parker, MT 96423-0066

Dear Lennon Windler,

I submit this application to express my sincere interest in the lead product engineer position.

Previously, I was responsible for circuit analysis and simulation in SPICE and MathCAD.

Please consider my qualifications and experience:

- Business or Innovation Management education is highly preferred
- Some experience in a similar, leading role is essential
- Experience in in System Engineering, Concept Design and Architecture, Requirement Management, Functional Analysis in Testing and Commissioning is highly desirable
- Exposure to Procurement related activities are nice to have
- Execute Test plans, including extensive set-up involving various types of instrumentation
- Coordinate Test activity with internal, external labs and at customers site
- Maintain instrumentation, tools and spare parts at customer site, coordinate calibration cycle, insure proper instrumentation is available when needed
- Formulate and implement test plans to achieve technical requirements, schedule and contract commitments

I really appreciate you taking the time to review my application for the position of lead product engineer.

Sincerely,

Baylor McGlynn
