

Lead Server Cover Letter

130 Morissette Crest Kilbackbury, AZ 44040-1178

Dear Emerson Gerlach,

I submit this application to express my sincere interest in the lead server position.

In my previous role, I was responsible for leadership in the areas of customer focus, continuous improvement, food safety, and personal safety as they relate to maintenance activities.

Please consider my experience and qualifications for this position:

- Technical support to all project managers on PPM Tool (Project Server)
- Identify, analyze, and recommend continuous improvement opportunities for delivery excellence to delivery directors across the OCC
- Develop and train all PMs on PPM and Project Management tools (Project Server, SharePoint)
- Revise Department policies and procedures as needed
- Expertise with a modern object-oriented programming language, especially Java
- Experience with AWS is highly preferred
- Deploying and maintaining VMware ESXi environments/host and guest builds
- Virtualization and virtual system administration

I really appreciate you taking the time to review my application for the position of lead server.

Sincerely,

Ryan Ruecker
