

Library Technician Cover Letter

48159 Janessa GatewayTurcottehaven, NH 07595

Dear Story Nikolaus,

I submit this application to express my sincere interest in the library technician position.

Previously, I was responsible for complex, independent problem solving for issues accessing databases, e-journals, and e-books, which involves advanced understanding of the integration of the libraries' knowledge base, bibliographic database, and discovery system and the methods by which resources are accessed through the vendors' databases.

Please consider my experience and qualifications for this position:

- Experience creating, using, and maintaining relational databases
- Understanding of the current information resource needs of clients in a college/university setting
- Demonstrated interest in and understanding of organization of information
- Knowledge of command line tools and computer languages
- Basic word processing and other computer skills
- Knowledge of basic library procedures and practices
- Familiarity with integrated library systems (Innovative Interfaces Sierra platform preferred)
- Proficiency in the use of the Internet is necessary

I really appreciate you taking the time to review my application for the position of library technician.

Sincerely,

Rory Dibbert
