

Linux Administrator Cover Letter

59324 Botsford MountSouth Venus, VT 84482-8320

Dear Emerson Ruecker,

Please consider me for the linux administrator opportunity. I am including my resume that lists my qualifications and experience.

Previously, I was responsible for effective provisioning, installation/configuration, operation, and maintenance of Linux and UNIX Servers in test, stage and production environments hosting multiple Oracle databases.

Please consider my qualifications and experience:

- Understanding of metrics analysis & health monitoring (Graphite, Nagios)
- Be available to join 24x7 support team – one week on, one week off
- Deploys the release of new technologies designs, installs, configures, maintains and performs system integration testing of PC/server operating systems, related utilities and hardware
- Provides new hardware specifications to users based on application needs and anticipated growth, installs new servers and maintains the server infrastructure. Search Jobs US
- Technical training in information technology and cyber security
- Understanding of enterprise datacenter technologies including Networking, Security, TCP/IP, SAN and NAS, physical datacenter practices
- Awareness on monitoring tools like Nagios etc
- Awareness on ticketing tools implemented on basis of ITIL process (incidents, changes, problem)

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Alexis Gleason
