

Mainframe Application Developer Cover Letter

88918 Jason ShoalsSkilesstad, LA 53428

Dear Justice Toy,

Please consider me for the mainframe application developer opportunity. I am including my resume that lists my qualifications and experience.

In my previous role, I was responsible for support for all components of business applications, and create project plans, schedules, work breakdown structures, diagrams and flow charts.

I reviewed the requirements of the job opening and I believe my candidacy is an excellent fit for this position. Some of the key requirements that I have extensive experience with include:

- Analyzes and estimates project costs and timelines
- Leads impact analysis
- Leads technical staff and collaborates with the Business Line and other project stakeholders
- Application design, coding, testing, with an understanding of mainframe batch systems
- Software Development Life Cycle and similar methodologies
- Mainframe online programming development
- Analyse Mainframe Applications performance for both batch and online and recommend Application tuning opportunities
- Provide recommendations to Application Development organizations for applications tuning

I really appreciate you taking the time to review my application for the position of mainframe application developer.

Sincerely,

Lennox McKenzie
