Mainframe Application Developer Cover Letter

12295 Bernhard TraceSouth Brandonstad, LA 00073

Dear Skyler Jacobi,

I am excited to be applying for the position of mainframe application developer. Please accept this letter and the attached resume as my interest in this position.

Previously, I was responsible for individual and project support for complex projects or applications, adhere to project timelines and technical deliverables within different client environments.

Please consider my experience and qualifications for this position:

- I prefer to have someone who has experience with JCL and some online/batch processing work
- Excellent working knowledge of the IBM OS/390 mainframe environment
- Solid experience and understanding of TSO/ISPF, DB2, JCL and other mainframe utilities
- MQ Processing
- API development and Microservices based on Westpac Digital Platform
- Good knowledge and experience in Core Domain (in Banking)
- Should have work experience on Oracle
- Should have work experience in Shell Scripting

I really appreciate you taking the time to review my application for the position of mainframe application developer.

Sincerely,

Finley Greenfelder
