

Mechanical Maintenance Cover Letter

1498 Victoria RidgesLake Seantown, PA 02302

Dear River Lowe,

In response to your job posting for mechanical maintenance, I am including this letter and my resume for your review.

Previously, I was responsible for active leadership of safety throughout the siteOversee preventive, predictive and scheduled maintenance on mechanical equipment.

My experience is an excellent fit for the list of requirements in this job:

- Knowledge of industrial equipment and hydraulics
- Industrial field experience
- Strong mechanical background (heat exchangers, boilers, etc)
- A good diploma in Mechanical Engineering or related engineering disciplines from a recognized institution
- Sound engineering knowledge of static and rotating equipment
- Good knowledge of cGMP and facility validation for the pharmaceutical industry will be an advantage
- Willing and able to work any shift with occasional weekends or holidays during peak seasons
- Mechanical maintenance trade qualification – Engineering Cert Level III

Thank you in advance for taking the time to read my cover letter and to review my resume.

Sincerely,

Rowan Reinger
